

# Introduction

---

Welcome to the Quick Start resource for projects on the Raspberry Pi! Here you will find useful links to help you get started with Python and some of the features of the Raspberry Pi.

## Python

---

Python is a highly readable scripting language used for a multitude of uses. Python can be used for web and software development, system administration, and even Scientific and Numeric uses. Need help learning the basics of Python? Check out the Official [Documentation](#) that is updated for each version of Python.

For tutorials and resources of the basics check out these resources:

- [Learn Python](#)
- [Python 3 Cheat Sheet](#)
- [General Python FAQ](#)
- [TutorialsPoint Python](#)

Still can't find what you are looking for? No need to worry, there are plenty of resources and tutorials out there that may answer your questions! Python is one of the many popular programming languages, so finding help/resources is not impossible.
